## FOREWORD BY THE MINISTER

*“The two words ‘information’ and ‘communication’ are often used interchangeably, but they signify quite different things. Information is giving out; communication is getting through.” – Sydney J. Harris (late American journalist and columnist).*

South Africa is on the threshold of another critical phase in its development as a democracy and economy.

Our emphasis as government on higher growth and job creation to reduce and ultimately eradicate poverty and inequality is, as President Jacob Zuma has put it, “the solution for the country”.

In addition, the President indicated in the 2012 State of the Nation Address that the work done in the previous year to create jobs “indicates that if we continue to grow reasonably well, we will begin to write a new story about South Africa – the story of how, working together, we drove back unemployment and reduced economic inequality and poverty”.

“It is beginning to look possible; we must not lose this momentum,” the President said.

We are mindful, as we turn to the Government Communication Strategy for the years to come, that while the Government Communication and Information System (GCIS) is at the heart of our story-telling as a nation, mere words are not, as someone once said, a substitute for action.

We are therefore aware that our underlying performance as a government and as a society as a whole is what will ultimately constitute the “new story about South Africa”.

It has been our experience in recent years that the South African story is more compelling and energising at home and abroad.

Greater numbers of South Africans are confident that the country is moving in the right direction, based on the five key priorities – fight against crime and corruption, health, employment, education and rural development – we have set for ourselves, and citizens are aware that our economy, which is strongly integrated into the international economy and financial systems, has been able to withstand the worst effects of the global downturn.

Internationally, this has positioned our country as a safe(r) haven for potential investors and trade partners.

As we set out over the coming years to finalise the National Development Plan, which sets out where we want to be in 20 years’ time, and as we embark on a massive infrastructure development drive, the hopes of our own people and the interest of international investors and trade partners are destined to intensify.

The infrastructure development programme is the ultimate public-private partnership into which we will enter – a programme in which government will procure extensively from the private sector that will, in the process of establishing the infrastructure, create jobs and contribute to the better life that remains our ultimate goal.

The years covered by the GCIS Strategic Plan therefore constitute a period during which we will need to energise the nation around our development goals and maintain the confidence of investors and partners internationally.

It is a time when the economic landscape will change dramatically, hopefully accompanied by an equally uplifting change in the psychological landscape of the nation as we develop pride in our achievements and share the wealth of the nation more equitably than before by closing the poverty gap and creating more opportunities for more of us.

It is against this backdrop that the GCIS Corporate Strategy and the National Communication Strategy will unfold until 2017, with flexibility being retained for changes in the objective environment that may force adaptations to new circumstances or challenges.

However, most of our assumptions are positive and ambitious, in keeping with our belief that South Africa continues to forge ahead in the right direction.

Our communication effort – *getting through*, that is – will be commensurate with our role as a developmental state that is located at the centre of a mixed economy, a state that has to lead and guide the economy and intervene in the interest of the poor, given the history of our country.

The GCIS will set about its mission conscious that each new year brings new challenges, new opportunities, new options and new technologies for us to communicate and through which to communicate.

During the period covered by this strategy, the GCIS will modernise its operations and practices and ramp up its outputs, from providing training to communicators, to leveraging government's considerable buying power in the advertising sector.

The GCIS will provide leadership at home while taking global best practice into account, of course within the confines of our fiscal means.

The adoption of new technologies and the skilling and reskilling of staff will be complemented by the outsourcing of key projects to partners in the private sector, stimulating business activity in the communications sector in the country.

The GCIS is undertaking also to deepen stakeholder relations so we can engage directly with communities and key constituencies in our society and economy, as we do not expect media to convey every detail and nuance of our work or intent to such groups.

Our communication effort should during these years match our role and standing in the international community and the global economy. The GCIS will therefore work more closely with The Presidency, the Department of International Relations and Cooperation and the economic clusters to ensure that our voice is heard internationally and that we hear the international community as clearly.

The forthcoming milestones of 20 Years of Democracy, the fifth democratic general election and the Millennium Development Goals are among landmarks that will arise during this strategic period.

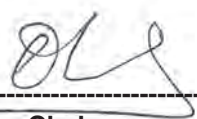

These are all exciting, communication-intensive milestones through which we can entrench social cohesion and build international interest and confidence in our ability as a country.

In the spirit of *Working Together* and given the GCIS' strategic positioning as the pulse of excellence in government communications, the GCIS will strengthen partnerships with stakeholders in government communication, the National Executive, provinces, local government and the private sector.

The strength of relationship is crucial in an environment where a complex web of inter- and co-dependencies are the key to our eventual success.

I take this opportunity to commend this Strategic Plan to Parliament and to wish the GCIS Chief Executive Officer, Mr Jimmy Manyi, and his GCIS team all of the best in their contribution to creating a better life for all our people.

Thank you.

**Mr Collins Chabane**  
**Minister in the Presidency**  
**Executive authority of GCIS**

## FOREWORD BY THE CHIEF EXECUTIVE OFFICER

The Strategic Plan of the Government Communication and Information System (GCIS) for the period 2012/13 to 2016/17 covers a critical period in the country's development as a democracy and a force in the international system.

The strategic plan anticipates foreseeable and unforeseeable developments that will place significant demands on the GCIS ability and readiness to function as the pulse of excellence in government communication.

In terms of the content of our communication, the focus remains the five national priorities of security, health, employment, education and rural development.

This focus will be augmented by the emphasis on infrastructure development, which is designed to act as a catalyst that will positively influence the achievement of government's objectives around the five key priorities.

Our thinking on the period ahead has been shaped by our quest for continuity that will build on our strengths and past successes, as well as by strategic input by Minister Collins Chabane and the Deputy Minister Obed Bapela, as well as research on public opinion and media discourse.

At the same time, our strategy builds on our record and reputation as the institution providing strategic leadership in government communication and coordinating the government communication system across all spheres of the government.

In terms of constraint, this strategic plan sets out an ambitious programme of work in the face of limited fiscal resources, especially in the early years of the period under discussion.

Adequate resourcing is essential for the implementation of both the GCIS Corporate Strategy and the Government-wide Communication Strategy that calls for an efficient organisation and a dynamic programme of engaging with South Africans and international stakeholders.

### **Informative. In touch. In partnership.**

In serving as the "pulse", the anticipated outcome is that of a public – in the country and abroad – that is effectively informed about government's policies, plans and programmes, and engages in two-way communication with government in the spirit of *Working Together*.

The climate in which we will operate in the years under discussion is shaped by a range of insights and experiences arising from the socio-political environment as well as from technological and economic factors.

South Africa's integration into the global economy has left the country vulnerable to the impact of the downturn on domestic conditions and especially the effort to create jobs. At the same time, our policy frameworks and pursuit of alternatives, including the Green Economy, have delivered some forms of resilience and shielding against global knock-ons.

### **Performance barometer**

In terms of public perception, South Africans are demanding greater government intervention and effectiveness in delivering services, controlling the cost of living, reducing crime rates, creating jobs, fighting corruption and increasing transparency and accountability.

These public priorities and demands for action line up clearly alongside government's own ambitions and delivery agreements in these areas.

Between half and three-quarters of South Africans perceive government as performing well in improving healthcare, delivering welfare payments, addressing education, promoting nation-building, encouraging international investment and improving public transport, among other positive developments.

These perceptions are at play at a time when the country is building up to marking 20 years of democracy, holding a fifth general election and assessing its performance against the Millennium Development Goals.

These landmarks are destined to generate intense internal assessments and public scrutiny over the performance of the current Administration and the dividends of the democratic dispensation as a whole since its inception.

At the same time, South Africa is being globalised rapidly through its role and profile as a force for good and transformation in the international system and its association with the emerging economic and political powers of the south, including Brazil, China and India.

### **How people make sense of it all**

The GCIS is tasked with bringing government information to citizens who are inundated with multiple sources – human and technological – of information minute-by-minute.

Much as there is only one government, information emerging from this source competes for citizens' attention spans and interaction with many other sources that impact on people's awareness and perception of government.

Between 2006 and 2010, radio was the most widely used media source in the country, followed by television, and with cell-phones outstripping the use of newspapers across all living standards measures (LSM) groups.

Even so, slightly less than a fifth of South Africans were found to have accessed the Internet during a sample seven-day period in the first half of 2011.

Noting rapid advances in information and communication technology, the GCIS will encourage the adoption of and experimentation with new technologies, fully aware that new modes may be short-lived or those new, previously unimagined options may become available in the next few years.

### **Action stations – the GCIS at work**

#### **Value for money**

For the GCIS, one of the key programmes in the years ahead is the entrenchment of the practice of media bulk buying on behalf of all departments and entities. This initiative will maximise government's buying power in the media market and ensure coherence of messages across campaigns.

This initiative will also entail recruitment of appropriately skilled and qualified staff as well as the acquisition of technology that will enable efficient service to client departments in a fast-paced environment, without compromising procurement regulations or creative quality.

Excellence in this area is critical to gain confidence across government that GCIS has got the people and the systems to run an efficient cost effective operation. GCIS has a duty to win back government accounts over and above relying on the Cabinet decision to centralise media buying.

GCIS in pursuance of achieving plurality and diversity will in particular also focus on the new entrants including community media, small commercial and larger media.

#### **Grooming government communicators**

The GCIS will during this period launch an unprecedented effort to train professional communicators and political leadership in communication skills, with a National Qualifications Framework credit bearing or accredited qualification.

This effort will build communication capacity nationally, provincially and locally, and will ensure that communication professionals will be effective in the full spectrum of communication, from interpersonal methods to working with media and managing campaigns.

This effort will involve partnership with public communication institution across Africa and other international centres as part of bringing the practice of government communication in line with best experiences globally.

#### **Operational improvement**

The most significant development during the period ahead is the relocation from the current headquarters in the centre of Pretoria to the new business hub in Hatfield.

This development is critical for staff morale and our relationship with stakeholders including The Presidency, political principals who rely on the GCIS infrastructure in their dealings with media, government communicators around Pretoria and the media.

The new premises are designed – literally and figuratively – to unleash creativity, establish synergy among **business units** that need to work together in close quarters but are currently physically dispersed, and to enhance our reputation and relations with stakeholders.

During this period, the GCIS will modernise various operations to ensure effectiveness and position the organisation as an employer and partner of choice in a professional and industrial sector that is highly responsive and innovative. In one aspect, supply chain management will be leveraged to enable the new programmes outlined earlier and to drive transformation in the sectors who we work with and procure goods and services from.

In human resource development and talent management new policies have recently been adopted to ensure high staff morale and productivity during the period ahead.

The automation of certain business processes, a new induction programme for incoming staff and the provision of technology that will allow staff to be productive when working remotely from Head Office or the nine provincial centres are on the drawing board as well.

### **On message**

This strategic plan covers a range of content-driven initiatives for improved engagement with audiences and constituencies within the country and elsewhere.

We anticipate:

- increasing the frequency of the *Vuk'uzenzele* newspaper
- making greater use of social media
- stepping up engagement with community media
- broadening the GCIS suite of publications
- rewarding excellence in government communication across all spheres
- maintaining alignment between cluster communication strategies and the broader Government Communication Programme
- expanded use of platforms such as community media, seminars, workshops, public participation, door-to-door interactions and Thusong Service Centres
- engagement with community media and other formations not represented by established structures such as the South African National Editors' Forum or the Foreign Correspondents' Association of Southern Africa
- working more closely and strategically with the Media Diversity and Development Agency to bring information to South Africans in media-poor parts of the country, strengthen our dialogue with citizens and catalyse transformation of the media sector and media economy
- offering unprecedented services and facilities to media from the new GCIS headquarters.

### **In closing**

As the pivot of the government-wide National Communication Strategy, the GCIS is required to fine-tune its own operations to mobilise respect and support across the total communication system.

The period ahead demands energy and innovation on the part of the GCIS and the total system and demands that we assert our long-held perspective that the GCIS is tasked with "communication as delivery, and not communication about service delivery".

It is a task we look forward to and through which we will serve the nation in totality.

I wish to take this opportunity to thank Minister Collins Chabane, Deputy Minister Obed Bapela and the Parliamentary Portfolio Committee on Communications for their strategic guidance, oversight and close interest in and support for the work we do.

This is also an opportunity for me to publicly thank the GCIS team in its totality for the commitment and energy shown in our effort to remain in conversation and consultation with the nation.

We look forward to the strategic period ahead.

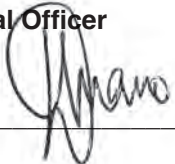

Mr Jimmy Manyi  
**Chief Executive Officer**

**OFFICIAL SIGN-OFF**

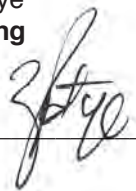

It is hereby certified that the management of the Government Communication and Information System (GCIS), under the guidance of the Minister, Mr Collins Chabane, developed this Strategic Plan. It takes into account all the relevant policies, legislation and other mandates, for which the GCIS is responsible.

It accurately reflects the strategic outcome-oriented goals and objectives, which the GCIS will endeavour to achieve over the next five years.

## PART A: STRATEGIC OVERVIEW

### 1. VISION

The pulse of communication excellence in government.

### 2. MISSION

Provide professional services, set and influence adherence to standards for effective government communication system. Drive coherent government messaging and proactively communicate with the public about government policies, plans programmes and achievements.

### 3. ORGANISATIONAL VALUES

VALUE	Meaning and behaviour associated with the value
<b>Professionalism</b>	<ul style="list-style-type: none"> <li>The organisation will strive to operate at the highest level of professionalism in all business dealings at all times.</li> <li>Professionalism is a valued quality that comprises friendly, polite and business-like characteristics. It drives a person's appearance, personality and professional interactions, providing others with a lasting first impression.</li> <li>Officials must demonstrate professionalism by adhering to courtesy, honesty and responsibility when dealing with clients and portraying the organisational image and integrity.</li> <li>Officials must demonstrate a level of excellence that goes beyond our normal work and official requirements.</li> </ul>
<b>Diversity</b>	<ul style="list-style-type: none"> <li>Officials understand that each person is unique, recognising and respecting their individual differences. This can include race, ethnicity, gender, age, religious beliefs, socio-economic status or other ideologies.</li> <li>The GCIS will promote a safe, positive and nurturing environment for everyone.</li> <li>Officials understand each other, beyond simple tolerance to embracing and celebrating the rich dimensions of diversity contained within each individual. Therefore, officials must embrace the variety of people within the GCIS; be able to respond to the diverse public; and harness the diversity of employees by giving people the freedom to express themselves – thereby contributing towards democracy and equality.</li> </ul>
<b>Openness and transparency</b>	<ul style="list-style-type: none"> <li>The organisation is open in all its communication and accountable and responsible for its actions.</li> <li>The GCIS values transparency and being straightforward and genuine in all its dealings with people.</li> <li>Officials provide colleagues and clients access to accurate, relevant and timeous information.</li> <li>The GCIS recognises that transparency and accountability are essential to good governance.</li> </ul>
<b>Innovation</b>	<ul style="list-style-type: none"> <li>The organisation strives for the receptivity of new ideas, thinking and approaches that are flexible and solutions that are different and officials have the ability to think beyond the norm.</li> <li>Officials often attend to problems and issues that others are unable or unwilling to address on their own.</li> </ul>
<b>Honesty and integrity</b>	<ul style="list-style-type: none"> <li>Officials exercise honesty in all their business dealings and strive to protect the integrity of the organisation.</li> <li>Officials commit to the actions they take to achieve the best possible outcomes for their clients.</li> <li>The GCIS strives for equity, fairness and good ethics in decision-making and in the treatment of one another.</li> <li>The GCIS honours its commitments with honesty and integrity to build a foundation for trust.</li> </ul>

## 4. LEGISLATIVE AND CONSTITUTIONAL MANDATE

Section 195 (g) of the Constitution of South Africa, 1996, is the basis of the formation of the GCIS where it stipulates that in order to foster transparency the public should be provided with information that is timely, accurate and accessible.

In 1998, the South African Communication Service was dissolved and the GCIS established by Cabinet, largely on the basis of recommendations contained in the report of the Task Group on Government Communications (Comtask: 1996: 58).

Government's mandate requires that its communication be expanded to enhance access to information that enables the public to participate in the country's transformation and in bettering their own lives; that it should bring the realities of our emergent and thriving democracy to the attention of the international community; and promote the renaissance of Africa, including regional integration and implementation of people-centred development programmes.

An in-depth understanding of the strategic intent is key to the correct interpretation of what the mandate of the GCIS seeks to achieve, thus enabling a more focused and impactful execution of the mandate. As the GCIS, our prime responsibility is to ensure the democratic strength, success and security of our country through rapid, responsive and continuous communication of government's achievements in meeting the mandate to rule given by the citizens of South Africa. The strategic intent speaks of necessity and therefore of the broad agenda of the manifesto of the ruling party.

The GCIS Strategic Plan is further informed by the above stated mandate as well as various relevant legislative mandates and related government policies and directives, which include:

### 4.1 The Constitution of the Republic of South Africa, 1996

In the execution of our functions and in line with its founding legislation, the GCIS complies with the Constitution with specific reference to the following sections:

- Section 41: cooperative governance values
- Section 195: basic values and principles governing public administration
- Sections 231: international agreements.

### 4.2 The Public Finance Management Act, (PFMA) 1999, (Act 1 of 1999 as amended).

### 4.3 The National Treasury Framework on developing strategic plans and annual performance plans.

### 4.4 The Medium-Term Strategic Framework (MTSF).

## 5. PLANNED POLICY INITIATIVES

### 5.1 Government Communication Strategy (GCS)

The GCIS will gradually implement the Cabinet-approved 2011/14 GCS over the MTEF and ensure alignment among all the three spheres of government. It will provide support to the lead departments in implementation of the five campaigns centered around the five priorities of government linked to the 2009/14 MTSF.

### 5.2 Set and influence adherence to government communication standards

The GCIS will set and influence adherence to government communication standards through the promotion of the *Government Communicator's Handbook*, which is inclusive of the communication policy guidelines. New communicators (heads of communication, ministerial liaison officers and provincial and local communicators) will be inducted on government communication standards and practices.

### 5.3 Media bulk-buying

Recommendations made by the Comtask Report stated that government was not taking advantage of the benefits of the economies of scale realised through coherent and centralised government media bulk-buying. Cabinet Memorandum no. 8 of 1998 mandated the GCIS to facilitate placement of all national government campaigns and advertising through a media bulk-buying contract approved by National Treasury.

In 2011, Cabinet again re-emphasised the need for government to implement media buying in this centralised manner, this time with GCIS playing the role of an in-house media buying agency for government.

## 6. SITUATIONAL ANALYSIS

The GCIS' mandate is to provide strategic leadership in government communication and coordinate a government-wide communication system that ensures that the public is continuously informed of government programmes and policies in a manner that would improve their lives. It also ensures the GCIS' strategic alignment with the national government agenda to support the five priority areas of government: education, fighting crime and corruption, health, job creation and rural development.

The Cabinet-approved Government Communication Strategy (GCS) 2011/14 provided the GCIS with an opportunity to implement its short and medium term communication plan. This strategy, though not fully funded, employs a more measured approach to government communication, which allows reflective baselines to be established. This has enabled targeted interventions in the pursuit of an optimally functioning government-wide communication system.

The implementation of this GCS 2011/14 not only provides implementation support to the step change in communication, but also ensures that citizens are empowered with access to information on government's progress, especially in attaining the five key national priorities.

The planning process identified a number of challenges and opportunities that are addressed in the 2012/17 strategic plan document. The identified areas presented following key challenges:

### *Access to information*

The poor in society often suffer deprivation on a number of counts. They suffer from material deprivation, as well as low levels of education and health. Marginalised groups in South African society are often powerless in respect of participating in political and social institutions. These circumstances limit citizens' abilities to make choices that can improve their well-being.

Poor South Africans also produce, receive and share information that is drawn from informal and unrecorded interpersonal communication. Reliance on informal information sources is often constrained and insular, particularly in remote areas that lack basic communication infrastructure and transport links. Much of the information and knowledge that can help poor people to improve the quality of their lives, educational standards and employment or business opportunities depends on government efforts to make it available to them. Commercial producers and transmitters of news and information are seldom, if at all, interested in "poor markets."

### *Government-wide communication system*

The challenge in the coordination of communication forums, for coherence of messages within the three spheres of government has been identified as the:

- implementation of the recommendations from Rapid Response provided to other government departments
- communication skills gap within the government-wide communication system

Introduction of and appointment of two chief directors responsible for cluster supervision is also meant to strengthen alignment and coherence of government messages.

## 6.1 PERFORMANCE ENVIRONMENT

Over the medium term, the department aims to leverage opportunities to improve the efficiency of the government-wide communication system.

### *Centralised media buying*

An in-house media buying model in which the GCIS deals directly with media and platform owners, has since been adopted following its approval by Cabinet in June 2011. Government departments' budgets are made to go further if saved funds are re-invested in campaigns. This will enable government to broaden its target audience and speak to a broader range of the public. Government would also be able to increase reach, which will result in more people being exposed to the message. This would also result in increased frequency, thus allowing the public to gain more opportunities to be exposed to messages. All government departments have been informed that all media buying must be channelled through the GCIS. This is in accordance with Cabinet's decision.

### *Diversified communication platforms*

A functioning and healthy democracy requires a dialogue between government and the civil society (the media, trade unions, religious formations, among others). To ensure that such a dialogue takes place, the GCIS is developing platforms and products that are targeted at specific groups in our society.

The information needs of South Africans point towards getting information directly from government. Government therefore needs to create platforms to communicate directly to and with South Africans. The GCIS coordinates government's Public Participation Programme, which aims to bring government closer to the people – are just but one example of such platforms.

The Thusong Service Centres (TSCs) (formerly known as Multi-Purpose Community Centres) remain a primary vehicle for the implementation of development communication and information, and to integrate government services into primarily rural communities. The GCIS strengthened the coordination of the mobile units in provinces; this was in response to the findings of the 2010 review of TSCs that recommended a more strategic and sustainable focus on mobile and satellite technology, rather than concrete structures, in ensuring universal access to information and services in marginalised areas.

In the previous financial year, *Vuk'uzenzele* magazine was converted into a government newspaper, thus resulting in a higher print run and an increased frequency. This government newspaper focuses on communicating government programmes and policies, including socio-economic opportunities created by government programmes, and how to access these. The newspaper has a supplement called Employment News, which addresses matters relating to job creation, careers and skills development. The change in format of *Vuk'uzenzele* into a newspaper is an example of responding to the demands for information from citizens within the confines of allocated resources.

In heeding the presidential call for a professional cadre of public servants, the *Public Sector Manager (PSM)* magazine, among others was established to create a platform to communicate with a strategic component of government's target audiences – middle and senior public sector managers. The magazine aims to help public sector/government managers and their departments/agencies to improve the quality of the services they provide by reporting on management innovations and best practices within the public sector. This is coupled with a quarterly newsletter that is aimed at government and public sector communicators in general, with the same objective of creating a platform through which as a defined section of public servants can share innovations and best practices.

### *Selected performance indicators*

The identified 18 indicators will measure the performance per year of the department over medium-term period according to the number of:

- national and international media coverage reports
- regular and ad hoc analytical reports
- copies of *Vuk'uzenzele* published
- rapid responses agendas and recommendations
- media briefing requests
- community and stakeholder liaison visits
- community media and outreach platforms aligned to the GCP
- communication materials such as pamphlets distributed
- media engagements implemented
- rapid response facilitated reports
- marketing events per TSC per year
- radio advertisements and dramas produced per year
- video programmes produced per year
- requests for photographic coverage handled per year
- live broadcasts on community radio stations per year
- radio talk shows arranged per year
- video coverage of government and national events
- graphic designs produced

## 6.2 ORGANISATIONAL ENVIRONMENT

The establishment of a 24-hour Rapid Response System that monitors media coverage has enabled the government-wide communication system to be more proactive and promptly reactive as compared to previous years. This is a deliberate strategy to increase government's share of voice to its citizens and defend the image of government.

For the GCIS, one of the key programmes in the years ahead is the establishment of a new business division, to manage media bulk-buying on behalf of all departments. This initiative will maximise government's buying power in the media market and ensure coherence of message across campaigns.

Establishing this new branch will entail recruitment of appropriately skilled and qualified staff as well as the acquisition of technology that will enable efficient service to client departments in a fast-paced environment, without compromising procurement regulations or creative quality. Excellence in this area is critical to dispel the unjustified criticism that centralising government's media buying power of approximately R1 billion a year is an exercise in ostracising commercial media.

Another significant development during the period ahead will be the relocation of the GCIS from the current headquarters in the centre of Pretoria to the new business hub in Hatfield. This development is critical for staff morale and our relationship with stakeholders including The Presidency, political principals who rely on the GCIS infrastructure in their dealings with media, government communicators around Pretoria, and the media.

The new premises are designed – literally and figuratively – to unleash creativity, establish synergy among business units that need to work together in close quarters but are currently physically dispersed, and to enhance our reputation and relations with stakeholders. During this period, the GCIS will modernise various operations to ensure effectiveness and position the organisation as an employer and partner of choice in a professional and media/communication sector that is highly responsive and innovative.

In one aspect, supply chain management will be leveraged to enable the new programmes outlined earlier, and to drive transformation in the sectors which we work with and procure goods and services from. In human resource development and talent management, new policies have recently been adopted to ensure high staff morale and productivity during the period ahead. The automation of certain business processes, a new induction programme for incoming staff and the provision of technology that will allow staff to be productive when working remotely from Head Office or the nine provincial centres are already being implemented.

The two newly established chief directorates for clusters will ensure better coordination of the cluster activities. The established chief directorate for government communication training will be responsible for training and capacity-building programmes for government communicators and political principals. The programme will be fully implemented over the five-year period and aims to create a calibre of government communicators that understand and are able to articulate government policies and programmes.

### 6.2.1 ORGANISATIONAL STRUCTURE

The GCIS has a staff complement of 483 employees out of a total establishment of 500.

The GCIS' mandate is to continuously communicate with and inform the public on the policies and programmes of government to improve their lives. In carrying out this mandate the GCIS has to provide strategic leadership in government communication. This calls for a workforce/employees with excellent strategic and communication skills and capabilities.

The GCIS has a number of human resources (HR) policies that took cue from the broader policy framework provided by the Department of Public Service and Administration (DPSA). However, these policies do not adequately respond to the strategic objectives of the organisation as well as the environment within which the GCIS operates.

In line with the recent GCIS and government-wide communication system review, the GCIS has had to reflect on its current organisational structure following a review of its corporate strategy priorities – the primary objective being to ensure alignment of the current structure with the new priorities to minimise structural imbalances and optimise the utilisation of our human capital in ways that helps the GCIS achieve its mandate.

The delivery imperatives of the GCIS have resulted in the review of the structure from the old branches into four programmes, each headed by a Deputy Chief Executive Officer, reporting to the Chief Executive Officer. Each programme has a number of sub-programmes, namely:

- **PROGRAMME 1: Administration**
  - Subprogramme 1.1: Departmental Management
  - Subprogramme 1.2: Human Resources
  - Subprogramme 1.3: Financial Administration
  - Subprogramme 1.4: Internal Audit
  - Subprogramme 1.5: Office Accommodation
  - Subprogramme 1.6: Strategic Planning and Programme Management.
  - Subprogramme 1.7: Information Management & Technology
  
- **PROGRAMME 2: Communication and Content Management**
  - Subprogramme 1.1: Management
  - Subprogramme 1.2: Policy and Research
  - Subprogramme 1.3: Government Communication Training and Development
  - Subprogramme 1.4: Marketing and Distribution
  - Subprogramme 1.5: Content and Writing
  
- **PROGRAMME 3: Government and Stakeholder Engagement**

## 6.3 DESCRIPTION OF THE STRATEGIC PLANNING PROCESS

### The pre-planning process

The 2011/14 Strategic Plan was partially aligned to the Framework on Developing Strategic Plans and Annual Performance Plans. The GCIS strove to fully align the 2012/17 Strategic Plan and Annual Performance Plan with the framework.

### National strategic planning session

The three-day strategic planning sessions took place from 19 to 21 July 2011, attended by all senior managers within the department. The Deputy Minister provided a political overview while the Chief Executive Officer provided the organisational overview and highlighted focus areas for acceleration over the five-year period. The session reflected on the current vision, mission and strategic objectives and subsequently reviewed them. By the end of the three-day sessions the department had developed a new vision, mission, goal (outcome) and strategic objectives for each branch, as well as outputs for implementation of the strategic objectives.

### Branches' strategic planning session

The Technical Assistance Unit (TAU) of the National Treasury was approached to help the department to assure the quality and provide technical input into the department's draft strategic plan. After the Management Committee planning workshop, the branches had to further develop five-year targets against the strategic objectives and outputs. The TAU facilitated the sessions for the Government and Stakeholder Engagement Branch and the Communication and Content Management, which took place on 1 August and 4 August, respectively. The planning unit in the department coordinated the Communication Service Agency's session on 8 August 2011.

All the planning sessions were completed by 10 August 2011 and the draft strategic and annual performance plans were forwarded to the TAU for quality checks and comments. The first Drafts Strategic Plan 2012/17 and 2012/15 Annual Performance Plan were forwarded to members of the Executive Committee for input and approval on 29 August 2011. The plans were submitted to National Treasury and the Department of Performance Monitoring and Evaluation as prescribed by the planning framework.

## 7. STRATEGIC OUTCOME-ORIENTATED GOALS OF THE INSTITUTION

The department has only one strategic-outcome oriented goal in support of government Outcome 12.

<b>Strategic outcome-oriented goal.</b>	Coherent, responsive and cost effective communication services for all government programmes.
<b>Goal statement.</b>	To provide strategic leadership in government communication and coordinate a government communication system that ensures the public is informed of government programmes and policies.

The GCIS, a transversal strategic communication organisation, provides communication support to implement government's 12 outcomes. It directly contributes to the implementation of outcome 12.

**Outcome 12:** An efficient, effective and development-oriented public service and empowered, fair and inclusive citizenship.

**Outcome 12B:** An empowered, fair and inclusive citizenship

The department will contribute to the outcome by ensuring that the government-wide communication system disseminates information on programmes and services that will improve people's lives. The following programme indicators will measure the progress over the five-year period.

### Output 1 Sub-output 2: Access to government service

In the period covered in the strategic plan the department will increase and strengthen the communication platforms.

**GCIS link to outcome 12**

- Number of marketing events per Thusong Service Centre
- Number of copies of Vuk'uzenzele published
- Number of media briefing requests

**PART B: STRATEGIC OBJECTIVES**

<b>Strategic objectives</b>	
<b>Strategic objective 1</b>	<b>Provide a responsive, cost-effective, compliant, and business-focused corporate services.</b>
<b>Subprogramme objectives</b>	<ol style="list-style-type: none"> <li>1. Implement efficient and effective strategic management processes and procedures in line with the relevant legislation.</li> <li>2. Implement best practice management for GCIS and government-wide communications projects.</li> <li>3. Attract and retain highly skilled human capital.</li> <li>4. Provide efficient and effective IT infrastructure and systems to deliver cost effective products and services.</li> <li>5. Provide professional internal audit services for governance improvement and risk control.</li> <li>6. Provide proactive, flexible, compliant and cost effective finance, supply chain, and facilities management.</li> </ol>
<b>Strategic objective 2</b>	<b>Building people, products, processes and a reliable knowledge base to ensure an effective government communication system.</b>
<b>Subprogramme objectives</b>	<ol style="list-style-type: none"> <li>7. Set and influence adherence to government communication standards.</li> <li>8. Provide strategic leadership and support in government communication through media monitoring, research, surveys and analysis to understand the communication environment and the pulse of the nation.</li> <li>9. Develop content and create platforms to grow the voice of government.</li> <li>10. Provide expertise to offer the best communication solutions to government through professional language services.</li> <li>11. Provide effective and efficient marketing and distribution services for government.</li> </ol>
<b>Strategic objective 3</b>	<b>Maintain and strengthen a well-functioning communication system that proactively informs and engages the publics.</b>
<b>Subprogramme objectives</b>	<ol style="list-style-type: none"> <li>12. Aligned messages across the three spheres of government to ensure coherence.</li> <li>13. Inform the citizenry on government's policies, plans programmes and achievements.</li> <li>14. Ensure informed stakeholders that extend the reach of government's communication effort.</li> <li>15. Provide strategic leadership and support in government communication by building, maintaining and improving relations with the media and driving the communication agenda.</li> </ol>
<b>Strategic objective 4</b>	<b>Provide an efficient and effective production, media bulk-buying and advertising agency for government.</b>
<b>Subprogramme objectives</b>	<ol style="list-style-type: none"> <li>16. Provide cost-effective media bulk-buying services for government.</li> <li>17. Provide cost effective and efficient electronic media products and services for government.</li> <li>18. Ensure production of high quality TV commercials and video footage, radio commercials and programmes, print adverts and graphic designs for client departments.</li> </ol>
<b>Strategic objective 5</b>	<b>Projecting, defending and maintaining the image of government and that of the state.</b>
<b>Subprogramme objectives</b>	<ol style="list-style-type: none"> <li>19. Set and influence the media agenda through a robust, proactive and efficient rapid response system.</li> <li>20. Manage corporate identity for government.</li> </ol>

## 8. DEPARTMENTAL PROGRAMMES

### 8.1 PROGRAMME 1: ADMINISTRATION

<b>Programme purpose</b>	Provide overall management and support for the department.
<b>Strategic objective</b>	Provide responsive, cost-effective, compliant, and business-focused corporate services.
<b>Links to the strategic oriented-outcome goal</b>	Ensure coherent, responsive and cost effective communication services for all government programmes.

The programme’s functions are organised into the following five sub programmes:

- **Strategic Planning and Programme Management** is responsible for the development of the GCIS’ strategic and Annual Performance plans including risk management. The sub-programme further monitors and evaluates the implementation of these plans and reports on the performance. It is also responsible for the implementation of a professional project management discipline for the GCIS and government-wide communication projects and campaigns.
- **Human Resources (HR)** is responsible for strategic leadership in the implementation of the department’s HR management strategy.
- **Information Management and Technology (IM&T)** is responsible for the establishment and support of information management and technology systems in the GCIS.
- **The Chief Financial Officer** provides the department with overall financial and supply chain management, auxiliary services, and guides management in complying with legislative requirements, budget planning and administration.
- **Internal Audit** improves risk management, control and governance processes.

**Strategic objective 1:** Provide a responsive, cost-effective, compliant and business-focused corporate services.

**Subprogramme objective:** Implement efficient and effective strategic management processes and procedures in line with the relevant legislation.

Output	Baseline	Performance indicator	Target				
			2012/13	2013/14	2014/15	2015/16	2016/17
Approved five-year strategic plan and three-year annual performance plans.	Partially legislation compliant 2011/12 -2013/14 Strategic Plan and 2011/12 Annual Performance Plan.	An approved five-year strategic plan and aligned three-year annual performance plans.	The five-year strategic plan and aligned three-year annual performance plans tabled in Parliament. ### 8.1.2 EXPENDITURE TRENDS

Expenditure increased from R73,5 million in 2008/9 to R122,5 million in 2011/12 at an annual average rate at 18,5%. The increase was mainly due to spending on compensation of employees which grew from R33,1 million to R47,9 million, at an average annual rate of 13,1%, due to additional allocation for improved conditions of service.

Spending in the Office Accommodation subprogramme increased from R12,2 million to R34 million between 2008/09 and 2011/12 due to increased lease costs in respect of the departments new head office building, while spending in the Corporate Services subprogramme increased from R34,3 million to R46,6 million due to increased spending on Information Management and Technology, as well as the expansion of the strategic planning and programme management office.

Over the medium term, expenditure is expected to increase to R135,8 million, at an average annual rate of 3,5%, mainly as a result of spending on compensation of employees, which increased due to an additional R11,6 million allocated over the medium term for improved conditions of service. The programme has a budget of R2,1 million for consultants between 2012/13 and 2014/15, which is mainly a contingency allocation to assist the department in the resolution of legal disputes.

### 8.1.3 RISK MANAGEMENT

Section 38(1) of the Public Finance Management Act (PFMA), 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations require the department to put a risk management system in place.

Strategic risk		Mitigation strategy
<b>Strategic objective 1:</b> Provide a responsive, cost-effective, compliant, and business-focused corporate services.		
1.	Non-adherence to corporate governance, particularly the PFMA and the Public Service Act, may lead to non-compliance in executing the department's functions.	<ul style="list-style-type: none"> <li>Provide continuous training to staff on government regulations.</li> <li>Create awareness among staff on the implementation of these regulations/legislation.</li> </ul>
2.	Unavailability of technology could impact the work of the GCIS.	<ul style="list-style-type: none"> <li>Redundancy built into the information technology infrastructure.</li> <li>Approved information technology continuity plan in place.</li> </ul>

## 8.2 PROGRAMME 2: COMMUNICATION AND CONTENT MANAGEMENT

<b>Programme purpose</b>	Provide strategic leadership in government communication to ensure coherence, coordination, consistency, quality, impact and responsiveness of government communication.
<b>Strategic objective</b>	Building people, products, processes and a reliable knowledge base to ensure an effective government communication system.
<b>Links to the strategic-oriented outcome goal</b>	Ensure coherent, responsive and cost-effective communication services for all government programmes.
<b>Link to outcome 12: output1: sub-output 2</b>	Access to government services

The programme's functions are organised into the following four subprogrammes:

- **Government Communication Training and Development** aims to professionalise government communication through developing training course content and identifying, coordinating and implementing effective training programmes for government communicators. The subprogramme builds competency to professionalise government communicators.
- **Policy and Research** conducts research through independent service providers to assess how government should address the public's information needs. It also monitors media coverage of government programmes from a communication perspective. Also, it provides an analysis on how the media interprets government policies and programmes, formulates policy proposals where it is required, proposes government response on any media-related issues and assesses public perceptions in relation to government performance.
- **Content and Writing** develops content for products to be produced by the GCIS. Funding for the subprogramme will be used for writing assignments; language services for products that require translation; editing and proofreading content; managing the development of government and departmental/provincial web sites; and the production of government publications.
- **Marketing and Distribution** manages and drives the distribution strategy of all the products produced for dissemination to the public and oversees the outsourcing of distribution services to the service providers. The subprogramme manages the corporate identity of government. It also provides marketing services for the GCIS and other government departments.

<b>Strategic objective 2:</b> Building people, products, processes and a reliable knowledge base to ensure an effective government communication system.						
<b>Subprogramme objective:</b> Set and influence adherence to government communication standards.						
<b>Output</b>	<b>Baseline</b>	<b>Performance indicator</b>	<b>Targets</b>

## 8.2.2 EXPENDITURE TRENDS

Expenditure increased from R98,1 million in 2008/09 to R99,5 million in 2011/12, at an average annual rate of 0,5%, and is expected to increase to R120,7 million over the medium term, at an average annual rate of 6,6%. The bulk of the increase over the medium term is concentrated in spending on compensation of employees, and goods and services costs related to the increased print run of the *Vuk'uzenzele* newspaper and research projects related to public opinion on government activities. This is mainly reflected in the increased spending on operating expenses, and travel and subsistence costs incurred during the research conducted to ascertain public opinion. The programme receives an additional allocation of R2,5 million over the medium-term for improved conditions of service.

Repositioning the *Vuk'uzenzele* magazine as a monthly newspaper is expected to increase the production run from 10 million copies in 2008/09 to 21,4 million copies each year over the medium term. Each print run of *Vuk'uzenzele* as a glossy magazine used to cost R3,2 million. Once it has been converted to a monthly newspaper, each print run will cost much less, at R1,2 million. The programme has a budget of R4,3 million for consultants between 2012/13 and 2014/15, which is mainly for skills related to the translation and transcription of the *Vuk'uzenzele* newspaper and the South African Year Book publication.

### 8.2.3 RISK MANAGEMENT

Section 38(1) of the PFMA, 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations require the department to put in place a risk management system.

Strategic objective 2: Building people, products and process and a reliable knowledge base to ensure an effective government communication system.	
Strategic risk	Mitigation strategy
3. <b>Cost cutting / static budget</b> The GCIS has a limited portfolio of government communication products. The need to grow the products and platforms has been identified but if there is cost cutting or the budget does not grow, the GCIS will not be able to grow the portfolio of products.	<ul style="list-style-type: none"> <li>• Reprioritisation.</li> </ul>
4. <b>Lack of communications skills within the government-wide communication system</b> This has been identified as a perennial problem since the GCIS was established through the COM-TASK team and in subsequent reviews.	<ul style="list-style-type: none"> <li>• Conceptualise and implement a credit bearing government communication qualification.</li> </ul>

### 8.3 PROGRAMME 3: GOVERNMENT AND STAKEHOLDER ENGAGEMENT

<b>Programme purpose</b>	Implementation of development communication through mediated and unmediated communication and sound stakeholder relations and partnerships.
<b>Strategic objectives</b>	Maintain and strengthen a well-functioning communication system that proactively informs and engages the publics.
<b>Links to the strategic oriented-outcome goal</b>	Ensure coherent, responsive and cost-effective communication services for all government programmes.
<b>Links to outcome 12: Output 1: Suboutput 2</b>	Access to government services.

The programme's functions are organised into the following four subprogrammes:

**Provincial and Local Liaison (P&LL)** ensures that the GCS is presented to the provinces for alignment. Funding will be used to procure various media channels, contracted human resources, platforms and materials to promote government messages to the public at local levels. The subprogramme is also responsible for promoting the Thusong Service Centres to the public, as well as ensuring that government departments send different print products and materials to these centres. The sub programme also coordinates government's PPP.

The Programme provides oversight responsibility to the **Media Development and Diversity Agency (MDDA)** and ensures that the transfer payments made to the public entity enables it to carry out operations in promoting local media development and diversity.

**Cluster Supervision** provides strategic cluster communication advice and support to departments. It also provides leadership on key cluster communication issues and campaigns. The cluster supervision subprogramme coordinates Cabinet cluster communications.

**Media Engagement** leads and drives interaction and communication between government and the media. Funding in this subprogramme will be used to ensure effective liaison between ministers and the media; manage on-going media-liaison services to government by ensuring they are providing government information; establish, strengthen and maintain working relationships with foreign and independent media; establish relations with South African missions and the Brand South Africa country managers with the view of disseminating government information and key targeted messages

<b>Strategic objective 3:</b> Maintain and strengthen a well-functioning communication system that proactively informs and engages the publics.						
<b>Subprogramme objective :</b> Set and influence adherence to government communication standards.						
<b>Output</b>	<b>Baseline</b>	<b>Performance indicator</b>	<b>Targets</b>			
			<b>2012/13</b>	<b>2013/14</b>	<b>2014/15</b>	<b>2015/16</b>
A functional internal government communication system for public servants.	No clear internal communication processes in government.	Internal communication forum held. ### 8.3.2 EXPENDITURE TRENDS

Expenditure increased from R79, 1 million in 2008/09 to R113,8 million in 2011/12 at an average annual rate of 12,9%, mainly due to the incorporation of the Media Engagement subprogramme from the Communication and Content Management Programme into the Government and Stakeholder Engagement Programme in 2011/12 as a result of an organisational review.

Expenditure is expected to increase over the medium term to R124,2 million at an average annual rate of 2,9% mainly in spending on compensation of employees and the transfer payment to the Media Development and Diversity Agency. An additional R4 million is allocated to this programme over the medium term for improved conditions of service.

The budget allocation for TSCs will be cancelled from 2013/14. It is expected that the cleaning up of the first generation TSCs should be finalised by the end of 2012/13. To aid in the provision of government services, it is planned that marketing the services of TSCs from 2012/13 will be intensified.

### 8.3.3 RISK MANAGEMENT

Section 38(1) of the PFMA, 1999 (Act 1 of 1999), as amended and Section 3.2 of the Treasury regulations require the department to put in place a risk management system.

<b>Strategic objective 3:</b> A well-functioning communication system that proactively informs and engages the public.		
<b>Strategic risk</b>		<b>Mitigation strategy</b>
5.	Government is not aware of the number of PPP events undertaken by political principals according to the set target of at least 10 PPPs a year per principal.	<ul style="list-style-type: none"> <li>Continuously remind political principals of their commitment to engage the public at least 10 times a year.</li> <li>Compile status reports on the events undertaken by each political principal to the Minister: Performance Monitoring and Evaluation.</li> </ul>
6.	Implement and monitor the communication strategy for the TSC programme.	<ul style="list-style-type: none"> <li>Monitor, evaluate and review the implementation of the TSC communication strategy.</li> </ul>

## 8.4 PROGRAMME 4: COMMUNICATION SERVICE AGENCY

<b>Programme purpose</b>	Provide media bulk-buying services and media production for the entire national government.
<b>Strategic objective</b>	An efficient and effective production, media bulk-buying and advertising agency for government.
<b>Links to the strategic oriented-outcome goal</b>	Coherent, responsive and cost effective communication services for all government programmes.

The programme's functions are organised into the following two subprogrammes:

- **Media Production:** the subprogramme produces graphic designs, videos, photographs and radio programmes in support of government communication programmes.
- **Media Bulk-Buying:** the subprogramme provides media buying expertise to government communication programmes, to the GCIS and other government departments.

**Strategic objective 4:** Provide an efficient and effective production, media bulk-buying and advertising agency for government.

**Subprogramme objective:** Provide cost-effective media bulk-buying services for government.

Output	Baseline	Performance indicator	Targets				
			2012/13	2013/14	2014/15	2015/16	2016/17

#### 8.4.2 EXPENDITURE TRENDS

Expenditure decreased from R37 million in 2008/09 to R28,5 million in 2011/12 at an average annual rate of 8,3% mainly due to the cancellation of the energy efficiency campaign in 2010/11 and communication programme in previous years. Expenditure is expected to increase over the medium term to R36,5 million at an average annual rate of 8,6% due to allocations for improved conditions of service and inflation related adjustments.

This programme receives an additional allocation of R1,3 million for the improvement of conditions to service.

The increase in spending on goods and services between 2011/12 and 2014/15 is mainly in advertising in line with projections for inflation, and for training and development for the training of officials in video and photographic software.

#### 8.4.3 RISK MANAGEMENT

Section 38(1) of the PFMA, 1999 (Act 1 of 1999), as amended and Section 3.2 of the National Treasury regulations

require the department to put in place a risk management system.

<b>Strategic objective 4:</b> Provide an efficient and effective production, media bulk-buying and advertising agency for government.	
<b>Strategic risk</b>	<b>Mitigation strategy</b>
7. <b>Lack of buy-in from departments</b> Resistance by departments to implement the Cabinet memo centralising government media bulk-buying to GCIS can undermine the rationale behind centralising media buying.	<ul style="list-style-type: none"> <li>Recruit skilled personnel that would offer an efficient and effective service to client departments.</li> <li>Implement an accounts management system.</li> </ul>

## PART C: LINKS TO OTHER PLANS

### 9. PUBLIC ENTITIES

The MDDA prepares and tables its strategic plans in Parliament separately and is managed by the GCIS as the responsible department through accountability arrangements (frameworks) developed and approved by the Executive Authority and the public entities' accounting authorities. Chief executive officer, accountable to the Board of Directors, head-up the MDDA.

#### 9.1 MEDIA DEVELOPMENT AND DIVERSITY AGENCY

The MDDA was set up in terms of the MDDA Act, 2002 (Act 14 of 2002) to enable historically disadvantaged communities and individuals to gain access to the media. The mandate of the agency is to create an enabling environment for media development and diversity, which reflects the needs and aspirations of all South Africans; redress the exclusion and marginalisation of disadvantaged communities and people from access to the media and the media industry; and promote media development and diversity by providing support primarily to community and small commercial media projects. The overall objective of the MDDA is to ensure that all citizens can access information in a language of their choice and to transform media access, ownership and control patterns in South Africa. The transfer of payment by the GCIS for 2011/12 was R 19 115 000.

#### PROGRAMMES

**Grant funding:** promotes and strengthens the small commercial and community media sector by preparing calls for applications; conducting project assessment and submitting project assessment reports; selecting projects for board approval; and entering into grant agreements, disbursing grants and preparing reports on grant funding activity.

**Advocacy for media development and diversity** contributes to improving the operating environment of community and small commercial media sectors by developing a strategy to increase revenue for these sectors, and engaging and mobilising support.

**Fundraising and resource mobilisation** strengthens, grows and protects the agency's capital funding and resource base by increasing the level of transfers from the agency's funders; increasing and maintaining funding revenue streams; and implementing the agency's fund development strategy and plan.

**Communication and public awareness** enhances and positions the agency as a leader in media development and diversity by targeting mainstream media; publishing the outcomes of the perception survey; maximising awareness of the agency's brand; and strengthening the agency's presence at provincial level. The unit has a staff complement of two.

**Stakeholder management** strengthens relations with the agency's contractual and non-contractual stakeholders by developing partnerships with academic institutions and the South African Broadcasting Corporation, and developing and setting up summits/forums with advertising companies to promote small commercial media.

## SELECTED PERFORMANCE INDICATORS
